

5 TIPS

to get started on the Generation Green Project

1

Think about what focus you want to do - Personal, Community or Urban Design.

2

Describe step-by-step what to expect the impact will be and what you will do.

3

Take time to plan out your idea! Start by behaving like normal then implement your action. Your impact is the difference between both actions!

4

Keep track of what you do in a journal or google doc. Write down challenges and successes, take pictures if you want to!

5

Stay positive and keep up your project to submit on April 10th!
